CAREER OBJECTIVE

As a fullstack web developer with nearly 2 years of experience, I have participated in developing various projects using Node.js, NestJS, React, MongoDB, and PostgreSQL.

With JLPT N2 Japanese proficiency and a long-term goal of working in Japan, I am looking to apply for the position of **System Engineer** to both utilize my technical skills and learn/adapt to the professional software development process in Japan.

CERTIFICATIONS

- Japanese: JLPT N2
- English: TOEIC 800

SKILLS

TECHNICAL SKILLS

- Frontend:** Next.js (React), TypeScript, Zustand/Redux, TailwindCSS, Responsive UI, i18n (đa ngôn ngữ)
- Backend:** NestJS (TypeScript), RESTful API, Middleware, JWT Auth, Role-based Access Control
- Database:** MongoDB, PostgreSQL, Prisma/TypeORM
- Testing:** Unit test với Jest, E2E test với Supertest
- DevOps:** GitHub Actions, CI/CD pipeline, Docker cơ bản, deploy FE (Vercel) / BE (Render)
- Documentation:** Swagger (OpenAPI) cho API, viết changelog và README chuyên nghiệp
- AI-assisted Coding:** GitHub Copilot, Cursor

LANGUAGES

- Japanese:** Able to communicate and understand basic IT technical documents in Japanese
- English:** Basic communication and good reading comprehension

OTHER SKILLS

- Good knowledge absorption
- Willingness and ability to learn new technologies
- Strong teamwork spirit

EDUCATION

Hanoi University of Science and Technology

Major: Electronics and Telecommunications Engineering
Graduation year: 2020 | Classification: Good

WORK EXPERIENCE

Fullstack Web Developer

Apusweb Joint Stock Company | 12/2023 – Present

- Develop RESTful backend API using Node.js (Express) and NestJS
- Build frontend UI using React.js and NextJS
- Design and manage databases: MongoDB, PostgreSQL
- Deploy on Render, Railway, Vercel, Mongo Atlas, Docker...
- Set up GitHub Actions, Unit Testing (Jest), and create Swagger API documentation

Digital Marketing Specialist

NEMI Joint Stock Company | 2/2021 – 12/2023
